NOTE: Tables 55-94

The data included in these tables were derived from the Staff Data System which is maintained by the Maryland State Department of Education. The information is contained in Certification/Professional Reports supplied by the counties of the State and Baltimore city. It is through their cooperation in submitting accurate data that these statistical tables have been made possible.

As the table titles indicate, only school-level professional personnel are included. Administrators in the schools are included, but those in central offices are excluded. New staff are those who were not employed in the public school system of the same local unit at the time of the previous report.

The reports, for the most part, deal with the school year 1975-76. The data have essentially the same base as those staff reports which this Department published in 1971-72 and prior years and, therefore, comparisons and trend data can be used. The personnel included in the statistics are those who were employed September 1975; but new staff may have been hired any time after October 1, 1974.

Personnel classed as separations are those who terminated their employment with a local unit between October 1, 1974 and September 30, 1975. In calculating the percent of separations, the base used is the total staff minus the new staff plus the separations. Personnel who left and returned to the same local unit during the year were not included as separations; they are deemed to be on leave.

Transfers between local units in tables 79 through 85 are determined by a cause reported by the unit from which the person left; transfers reflected in the new staff tables 86 through 94 are those reported by the local unit to which the transfers went. (In other words, a person leaving one unit often does not report that he/she is going to another Maryland locality, but the unit to which the person goes, knows this from the employment record.)
